↑ Oracle APEX: Foundations   ♡   ⌣   ⊞ Community   You are enrolled in this path!

Learning Path   Enrolled   **Status**
                              Completed

Get started with low-code application development using Oracle APEX, and learn how to build scalable, secure enterprise apps with world-class features that can be deployed anywhere.

In this learning path, you will learn to:

- Create an APEX Service instance
- Provision an APEX workspace
- Build cloud applications using APEX on OCI
- Create and manage database objects using SQL Workshop
- Create and manage reports, forms, and other pages in your applications
- Manage your application security
- Deploy applications

After you have completed the course and cleared the assessment, you will earn the **Oracle APEX Foundations** badge, which you can share on your social network to show your expertise in the technology.
